Cumulative index 1974-84

A cumulative index of articles published in Nature and Resources *over the last decade is given below. The articles are grouped under three headings: by subject (including geographic location), by author and by title. This index refers only to main articles and does not include the large number of short news items or book reviews which have also appeared in the journal. We hope that the index will be useful to readers. Those readers who would like to complete their collections of* Nature and Resources, *or who discover any back numbers of special interest, are invited to fill out the form inserted in this issue and return it to the Editor,* Nature and Resources. *We will attempt to supply the requested issue(s) free of charge, within the limits of stock available. We would also appreciate your indicating which articles you find particularly interesting.*
